Erratum

Index to Subjects—Volume 9, 1983

Pages of XII and XIII of the *Index to Subjects* are actually pages X and XI.

Springer-Verlag New York Inc. 1983

Index to Subjects—Volume 9, 1983

Current Microbiology
An International Journal

© Springer-Verlag 1983

A-layer, surface protein array, 315
Acetate-induced inactivation of isocitrate dehydrogenase, 73
Acetate nonutilizing (acu) mutants of *Aspergillus terreus*, 55
Acetylene reduction in *Aquaspirillum magnetotacticum*, 305
Acholeplasma growth inhibition, 177
Acid phosphatases in *Sporothrix schenckii*, 253
Acinetobacter calcoaceticus, emulsifier production by, 309
Acyl chain configuration, 241
Aeromonas salmonicida, cell surface hydrophobicity, 315
Alanine racemase, 235
Alcohols, *Aureobasidium pullulans* and, 169
Alveolar macrophages, feline, 63
Amino acid composition in *Ustilago*, 163
Aminoglycoside resistance, 329
Anaerobes, protoheme-synthesizing, 59
Anaerobic wastes, oxygen-intolerant methanogenic bacteria in, 355
Antibiotic resistance in *Bacillus* species, 69
Aquaspirillum magnetotacticum, nitrogen fixation in, 305
Arginine catabolism, 145
Arginine deiminase
  Mycoplasma, 177
  mycoplasmal growth inhibitor and, 177
  in *Streptococcus sanguis*, 145
Aspergillus terreus, glyoxylate cycle in, 55
Aureobasidium pullulans, alcohols and, 169
Azospirillum lipoferum, 305
Azotobacter vinelandii, 305

Bacillus licheniformis, antibiotic resistance in, 69
Bacillus species, cell wall strength of vegetative cells of, 13
Bacillus sphaericus, antibiotic resistance in, 69
Bacillus stearothermophilus spore coat material, 121
Bacillus thuringiensis, mosquitocidal protein, 279
Bacterial spores, heat resistance of, 173
Bactericidal activity of fresh human serum, 25
Bacteroides ruminicola, deuteroheme-synthesizing, 59
Bacteroides succinogenes, protoheme-synthesizing, 59
BAYE broth, *Legionella* and, 1
Bioemulsifiers, nondialyzable, 309
Butyribacterium methylotrophicum, nutritional growth requirements for, 151
Butyribacterium rettgeri, 151

Cadmium, *Methanosarcina barkeri* 'Fusaro' and, 187
Campylobacter, thermotolerant, 291
Candida albicans, chitin synthase from, 51
Carbon substrates, single, *Butyribacterium methylotrophicum* growth on, 151
Cardiolipin, *Pseudomonas pertucinogena*, 205
Carrier molecules, *Streptococcus agalactiae* and, 333
Cat alveolar macrophages, 63
Catalase activities in *Saccharomyces cerevisiae* var. *ellipsoideus*, 19
Catechol-2,3-oxygenase, 219
Cell envelope
  Haemophilus influenzae type b, 93
  Legionella pneumophila, 349
Cell surface hydrophobicity of *Aeromonas salmonicida*, 315
Cell suspensions, monolayers and, 141
Cell wall strength of *Bacillus* species, 13
Cell walls, *Mycobacterium leprae*, 269
Cellulolytic system of *Clostridium thermocellum*, 195
Cellulose, *Clostridium thermocellum* and, 195
Cephalosporins, third-generation, 329
Chitin synthase from *Candida albicans*, 51
Chlamydia trachomatis recovery, McCoy cell suspensions and, 141
Chloramphenicol, resistance to, 69
Chloroaniline, cometabolic degeneration of, 81
Chlorobiaceae hydrogenase, 215
Chloroform extraction (ch-Mcin), 177
p-Chloromercuribenzoic acid, us-Mcin after, 177
Chromatiaceae hydrogenase, 215
Clostridium botulinum colonization, metronidazole and, 275
Clostridium species, ribosomal ribonucleic acid similarities, 111
Clostridium thermocellum, yellow affinity substance and, 195
Coat material from *Bacillus stearothermophilus* spores, 121
Cobalt chelate of deuteroporphyrin, 59
Colonization, *Clostridium botulinum*, 275
Cometabolic degradation of chloroaniline, 81
Complementation analysis, *Aspergillus terreus*, 55
Cooling towers, *Legionella pneumophila* in, 319
Copper
  Methanosarcina barkeri 'Fusaro' and, 187
  toxicity in nickel-resistant strains of *Neurospora crassa*, 127
Cortex, forespore, 173
Cycloheximide, *Chlamydia trachomatis* and, 141
Cyclopiazonic acid, translation inhibition by, 259
Cysteine, thermal denaturation protection, 99
Cytochalasin B, *Chlamydia trachomatis* and, 141
Cytochrome b, protoheme-containing, 59
Cytochrome c of *Ustilago*, 163
Cytochrome components of *Pseudomonas stutzeri*, 87

Denitrifying *Pseudomonas stutzeri*, 87
Deuteroheme-synthesizing anaerobes, 59
Deuteroporphyrin IX, anaerobes and, 59
Dicotyledonous hosts, 163
Digitonin treatment, *Candida albicans*, 51
Dithiotreitol, thermal denaturation protection and, 99

Electrophoresis, plasma membrane proteins of *Podospora anserina*, 133
ELISA, *Rhizobium* strains, 45
Elongation factors EF-1 and EF-2, 259
Emulsifier production by *Acinetobacter calcoaceticus*, 309
Energy-dispersive X-ray microanalysis, 187
Enzyme-labeled protein A, 45
Escherichia coli
  phosphorylation of isocitrate dehydrogenase in, 73
  transposon insertions and, 245
Escherichia coli K-12, proline biosynthetic genes in, 31
Escherichia intermedia A-21, 235
Ethanol, *Aureobasidium pullulans* and, 169

Ethanol-grown cell metabolism, 19
Eubacterium limosum distinct from *Butyribacterium methylotrophicum*, 151
Euglena gracilis, negative phototaxis of, 285

Facultative methylotrophic bacteria, nitrogen assimilation in, 37
Fatty acid distribution, temperature changes and, 241
Fatty acids
Pseudomonas pertucinogena, 205
saturated, on *Lactobacillus leichmanii* growth, 105
Feces, oxygen-intolerant methanogenic bacteria in, 355
Feline alveolar macrophages, 63
Fermentation of cellulose, 195
Flavin quenchers and inhibitors, 285
Forespore protoplasm during sporulation, 173
Freezing nucleus capability, 263

β-Galactosidase of *Lactobacillus murinus*, 99
Glove cabinet, anaerobic conditions, 355
Glucose
Aureobasidium pullulans and, 169
Butyribacterium methylotrophicum growth on, 151
Glucose-grown cell metabolism, 19
Glucose metabolism, cometabolic degradation of chloroaniline because of, 81
Glucose repression of arginine deiminase system, 145
Glutamate dehydrogenase synthesis, 37
Glutamine synthetase regulation, 37
Glutathione, thermal denaturation protection and, 99
Glyoxylate cycle in *Aspergillus terreus*, 55
Growth requirements, nutritional, for *Butyribacterium methylotrophicum*, 151

Haemophilus equigenitalis reclassification, 155
Haemophilus influenzae type b, hemin transport by, 93
Haloanaerobium praevalens, 225
Halophile, obligately anaerobic, 225
Heat resistance of bacterial spores, 173
Hemin transport by *Haemophilus influenzae* type b, 93
Hemolysin, extracellular, 333
Hexadecane, 309
Human serum, fresh, bactericidal and opsonic activity of, 25
Hydrogen peroxide, negative phototaxis of, 285
Hydrogenase distribution and orientation in photosynthetic bacteria, 215
Hydrophobic molecules, *Legionella* cell envelope and, 349
Hydrophobicity, cell surface, of *Aeromonas salmonicida*, 315
Hyperbaric oxygen, superoxide dismutase activity and, 19
Hypersaline surface sediment halophile, 225

Ice nucleation-active bacterium, 263
Iron–copper antagonism in *Neurospora crassa*, 127
Iron requirement of *Haemophilus*, 93
Isocitrate dehydrogenase, phosphorylation of, 73

Keratin, spore coat material and, 121

Lactobacillus leichmanii
growth, fatty acids and, 105
β-oxidation and, 105
Lactobacillus murinus, β-galactosidase of, 99
Latent freezing nucleus capability, induction of, 263
Lauric acid on *Lactobacillus leichmanii*, 105
Lead, *Methanosarcina barkeri* 'Fusaro' and, 187
Lead phosphate, *Sporothrix schenckii* and, 253
Legionella pneumophila
cell envelope, 349
in Mount Saint Helens blast zone, 345
seasonality, 319
Legionella species
in thermally altered waters, 77
tolerance to sodium chloride, 1
Lipid differences in *Pseudomonas pertucinogena*, 205
Lysocardiolipin, *Pseudomonas pertucinogena*, 205

M1 bacterium, 263
Macrophage association of *Aeromonas salmonicida*, 315
Macrophages, feline alveolar, 63
Magnesium sulfate as osmotic stabilizer, 301
McCoy cell suspensions, *Chlamydia trachomatis* recovery and, 141
Membrane competition experiment for ribosomal ribonucleic acid similarities, 111
Membrane protein, spiralin, 7
β-Mercaptoethanol
pretreatment with, 301
thermal denaturation protection and, 99
Mercury, *Methanosarcina barkeri* 'Fusaro' and, 187
Metals, heavy, *Methanosarcina barkeri* 'Fusaro' and, 187
Methanogenic bacteria, oxygen-intolerant, prevalence, 355
Methanol
Aureobasidium pullulans and, 169
Methanosarcina barkeri 'Fusaro' grown on, 187
Methanosarcina barkeri 'Fusaro,' 187
Methionine in cytochrome components, 87
2-Methylnaphthalane, 309
N-Methyl-N′-nitro-N-nitrosoquanidine (MNNG), *Aspergillus terreus* and, 55
Methylotrophic bacteria, facultative, nitrogen assimilation in, 37
Metronidazole-induced susceptibility to *Clostridium botulinum*, 275
Michaelis–Mentin kinetics, phagocytic process, 63
Micrococcus, phenanthrene oxidation by, 219
Micrococcus cryophilus, 241
Molybdenum chelate of deuteroporphyrin, 59
Monochloroanilines, 81
Monocotyledonous hosts, 163
Monolayers, cell suspensions and, 141
Mosquitocidal protein, 279
Mu phages, transposon insertions and, 245
Mucoid strain of *Pseudomonas aeruginosa*, 25
Mucor rouxii spheroplasts, 301
Mud(Ap, *lac*) bacteriophage, 31
Mycelium growth, *Aspergillus terreus*, 55
Mycobacterial spheroplast formation, 201
Mycobacterium leprae cell wall characterization, 269
Mycoplasma, mycoplasmal growth inhibitor from, 177
Mycoplasmal growth inhibitor, 177

Negative phototaxis of *Euglena gracilis*, 285
Neurospora crassa, nickel-resistant strains of, 127
Nickel chelate of deuteroporphyrin, 59
Nickel-resistant strains of *Neurospora crassa*, 127
Nitrite reductase synthesis, *Neurospora crassa*, 127
Nitrogen assimilation, facultative methylotrophic bacteria, 37
Nitrogen fixation in *Aquaspirillum magnetotacticum*, 305
Nonmucoid strain of *Pseudomonas aeruginosa*, 25
Nutritional growth requirements for *Butyribacterium methylotrophicum*, 151

Opsonic activity of fresh human serum, 25

β-Oxidation, *Lactobacillus leichmanii* and, 105
Oxygen-intolerant methanogenic bacteria prevalence, 355

Penicillium islandicum, lytic enzyme preparation from, 301
Phagocytosis, *Pseudomonas aeruginosa*, 25, 63
Phenanthrene oxidation by *Micrococcus*, 219
Phenolate compounds, *Vibrio*, 209
Phosphatidylethanolamine
Pseudomonas pertucinogena, 205
temperature and, 241
Phosphatidylglycerol
Pseudomonas pertucinogena, 205
temperature and, 241
Phospholipid distribution, temperature and, 241
Phosphorylation of isocitrate dehydrogenase, 73
Photosynthetic bacteria, hydrogenase distribution and orientation in, 215
Photosynthetic bacterium, *Rhodopseudomonas sphaeroides*, 339
Phototaxis, negative, of *Euglena gracilis*, 285
Plasma membrane proteins of *Podospora anserina*, 133
Plasmid analysis of *Serratia marcescens*, 329
Podospora anserina, plasma membrane proteins of, 133
Polymorphonuclear leukocytes, *Pseudomonas aeruginosa* strains and, 25
Polyphosphate bodies, *Methanosarcina barkeri* 'Fusaro,' 187
Proline biosynthetic genes, 31
Protein A, enzyme-labeled, 45
Protein synthesis inhibition by cyclopiazonic acid, 259
Protocatechuate pathway, 219
Protoheme-synthesizing anaerobes, 59
Protoplast fusion, *Rhodosporidium toruloides*, 297
Pseudomonas aeruginosa
fresh human serum and mucoid and nonmucoid strains of, 25
phagocytosis of, 63
Pseudomonas AM1, 37
Pseudomonas MA, 37
Pseudomonas pertucinogena, lipids of, 205
Pseudomonas stutzeri, cytochrome components of, 87
Psychrophilic bacterium, temperature and, 241
Pyridine hemochromogen spectra, 59

Rhizobium strains, ELISA identification of, 45
Rhodococcus sp. An 117, glucose metabolism by, 81
Rhodopseudomonas sphaeroides, diagnostic features of, 339
Rhodospirillaceae hydrogenase, 215
Rhodosporidium toruloides cell type, 297
Ribosomal ribonucleic acid similarity, 111
rRNA similarities, 111
Rumen bacteria, cytochrome-synthesizing, 59

Saccharomyces cerevisiae var. *ellipsoideus*, superoxide dismutase and, 19
SDS (sodium dodecyl sulfate), mycobacteria and, 201
Selenomonas ruminantium, protoheme-synthesizing, 59
Sensory transduction of negative phototaxis, 285
Serine dehydratase, D- and L-, 235
Serratia marcescens, plasmic analysis of, 329
Siderophore synthesis, *Vibrio*, 209
Sodium chloride, tolerance of *Legionella* species to, 1
Sodium dodecyl sulfate (SDS), mycobacteria and, 201
Spheroplasts
formation of, mycobacteria, 201
Mucor rouxii, 301
Spiralin, subgroup I-1 spiroplasmas, 7
Spiroplasmas, subgroup I-1, 7
Spores
Bacillus stearothermophilus, 121
bacterial, heat resistance of, 173
Sporothrix schenckii, acid phosphatases in, 253
Sporulation, forespore protoplasm during, 173
Stability of chitin synthase, 51
Staphylococcus aureus, toxic-shock toxin, 325
Streptococcus agalactiae, carrier molecules and, 333
Streptococcus sanguis, arginine deiminase system in, 145
Streptomycin, resistance to, 69
Sucrose repression of arginine deiminase system, 145
Superoxide dismutase in *Saccharomyces cerevisiae* var. *ellipsoideus*, 19

Taylorella equigenitalis as *Haemophilus equigenitalis*, 155
Temperature, fatty acid distribution and, 241
Tetrapyrrole utilization by anaerobes, 59
Thermal denaturation protection, 99
Thermal stability experiment for ribosomal ribonucleic acid similarity, 111
Thermally altered waters, *Legionella* species in, 77
Thermotolerant *Campylobacter*, 291
Toxic-shock toxin, *Staphylococcus auerus*, 325
Transduction, sensory, of negative phototaxis, 285
Transposon insertions, Mu phages and, 245
Trypsin treatment, *Candida albicans*, 51
Tyrosine phenol lyase, 235

Ultrasonication, mycoplasmal growth inhibitor by, 177
Ureidopenicillins, 329
us-Mcin, *see* Ultrasonication
Ustilago, cytochrome c of, 163

Vanadium chelate of deuteroporphyrin, 59
Vegetative cells of *Bacillus* species, 13
Vibrio siderophore synthesis, 209
Viologen redox dyes, photosynthetic bacteria, 215

Water, thermally altered, *Legionella* species in, 77
Water content, *Bacillus* species cell, 13
Water cooling towers, *Legionella pneumophila* in, 319
Water habitats, *Legionella pneumophila* in Mount Saint Helens blast zone, 345

X-ray microanalysis, energy-dispersive, 187

Yellow affinity substance, *Clostridium thermocellum*, 195

Zinc, *Methanosarcina barkeri* 'Fusaro' and, 187
Zymogenic nature of chitin synthase, 51
